Must Read before you begin installation

- Prior to starting the CA4K™ installation, you must make certain you have Full Administrator privileges without any restrictions. This includes lowering the UAC settings to “Never Notify” and verifying there are no domain restrictions. Failure to do so will result in installation failures.
- Verify the CA4K™ Software license on the CA4K Server (host) supports at least 5 workstations.
- The CA4K Workstation should point to the CA4K Server (Host).
- If the EPI Badging has been purchased, it is highly recommended to install it on a CA4K™ workstation. If EPI Badging is installed on the CA4K™ host, the performance might be degraded.

Overview

This document provides a step by step procedure of a CA4K™ **Workstation** installation. Prior to starting the installation, you must verify the computer meets the recommended computer specifications. By default, a CA4K™ Workstation points to the CA4K™ Server. During the installation of a Workstation, you will be prompted to enter in the IP address of the CA4K™ Server (Messaging Server).

System Requirements

Ensure Recommended Server Requirements are met

Make sure the server meets the specifications that are documented in the **CA4K™ System Requirements** document.

Verify Full Administrator Permissions

Continental Access requires Full Administrator permissions to install the CA4K™ software. Failure to provide these permissions will result in installation failures.

Prerequisites

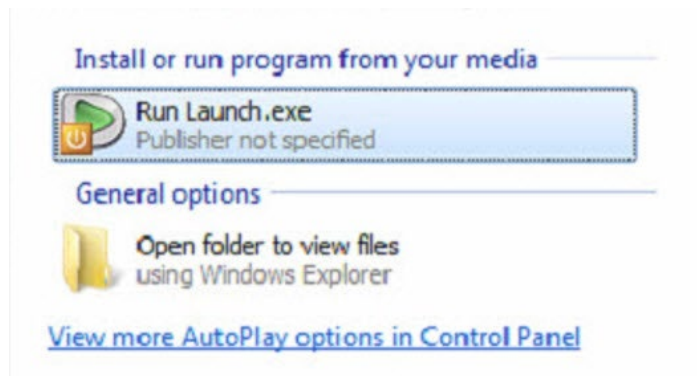

The following prerequisites are required prior to installing CA4K™. If they are not detected, they will be installed automatically:

- .Net Framework 4.72
- Microsoft Visual C++ Redistributable Packages
- SAP Crystal Reports

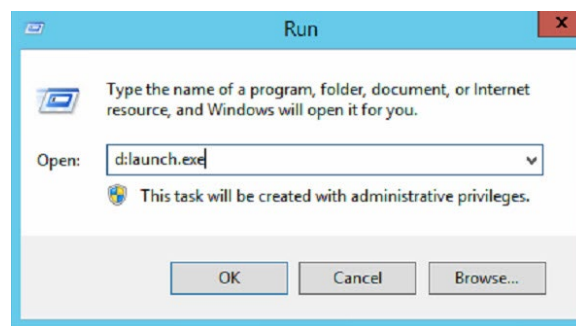

CA4K™ Workstation Installation

1. Insert the CA4K™ Installation DVD into the DVD drive. If **Auto-Play** is enabled on the computer, the software will launch automatically. On some operating systems, the following screen will display. If the screen below displays, click **Run Launch.exe** to start the installation. **Note:** a different screen might display where it is required to **Tap** the screen to launch the installation.

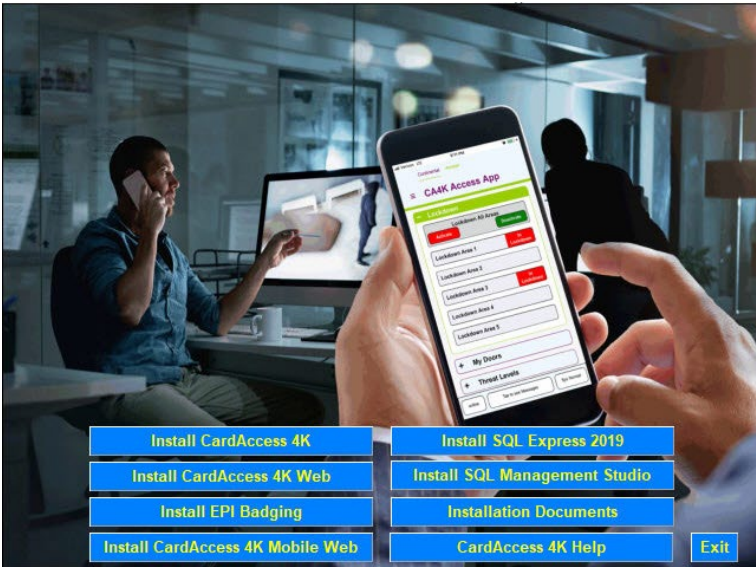

Note: The version on the following screens might not be the latest version, but the screens will be the same.

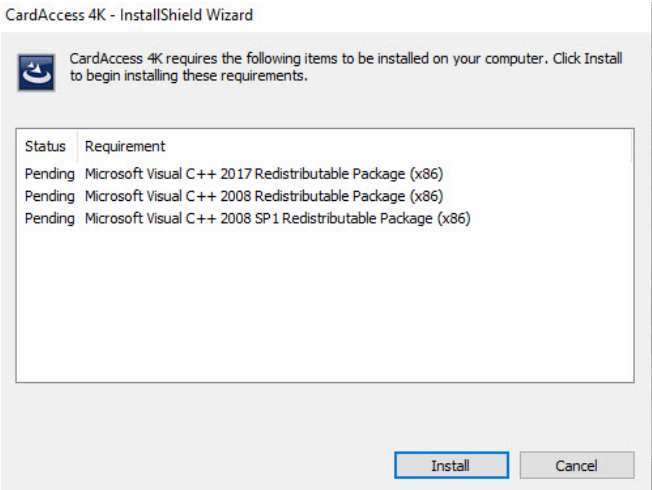

2. If **Auto-Start** is not enabled on the computer, you must manually launch the CA4K™ installation. Simply click the Windows Start button, then click **Run**. In the Run window, browse to the DVD and select **launch.exe** from the DVD drive. Alternatively, you can navigate to the DVD manually and run **launch.exe**. For our demonstration, the DVD drive letter is D:.

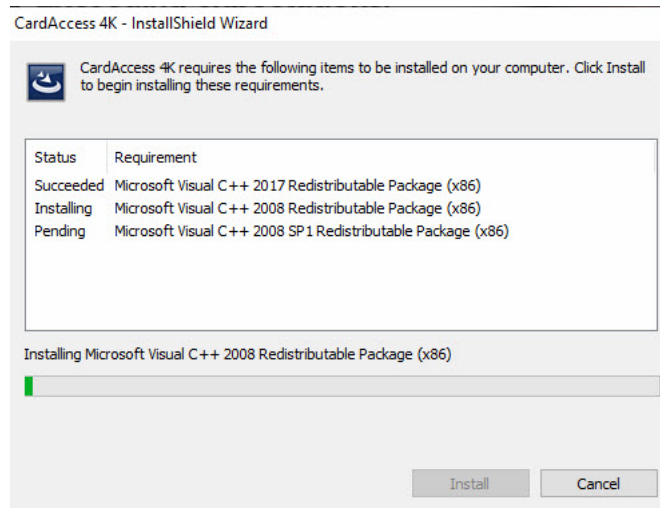

3. If the installation launches automatically, the CA4K™ main menu will display. Click **Install CA4K™** on the Main menu.

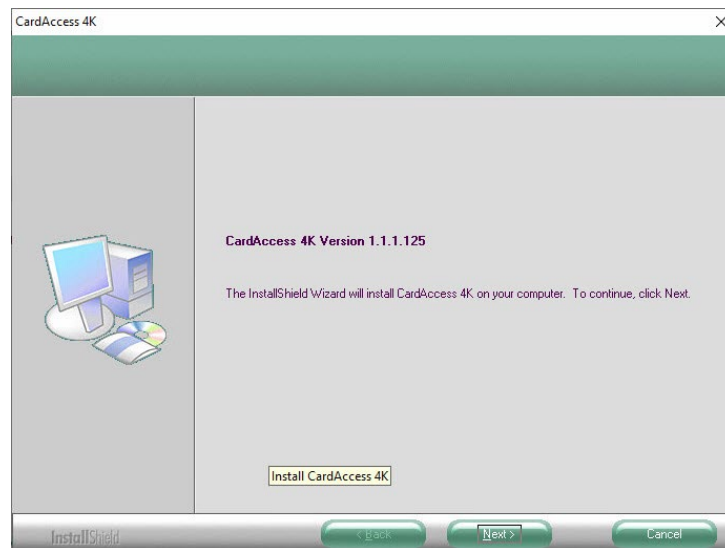

4. The **Requirements** screen displays all the required software components which must be installed before the installation begins. Click **Install**.

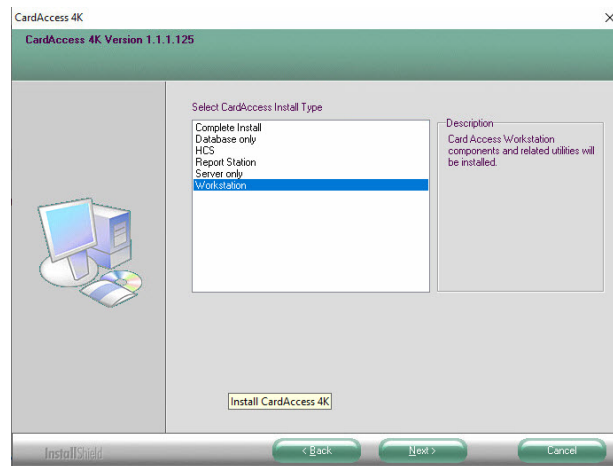

5. A progress bar will display as the **required software components** are being installed.

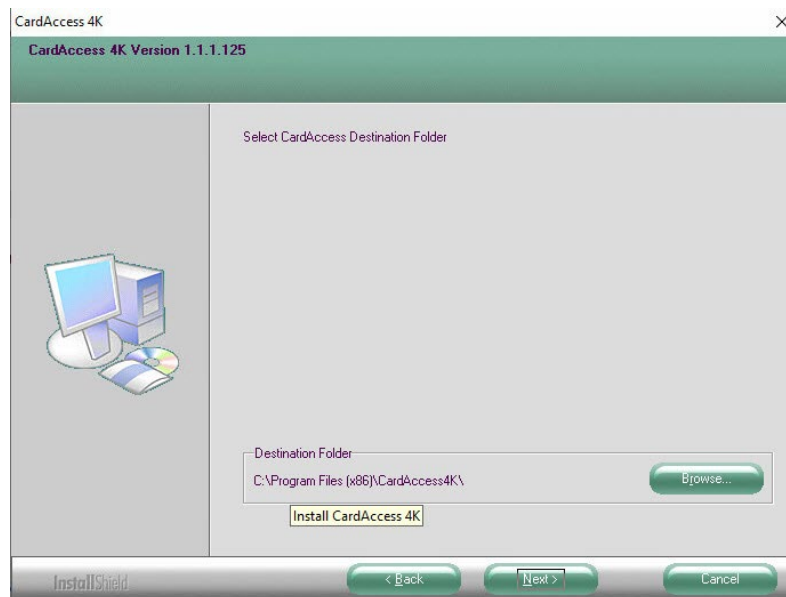

6. After the required software components are installed, the **Welcome to CA4K™ Setup program** screen will display. Click **Next**.

7. The **Setup Type** screen displays. Select **Workstation**. Click **Next**.

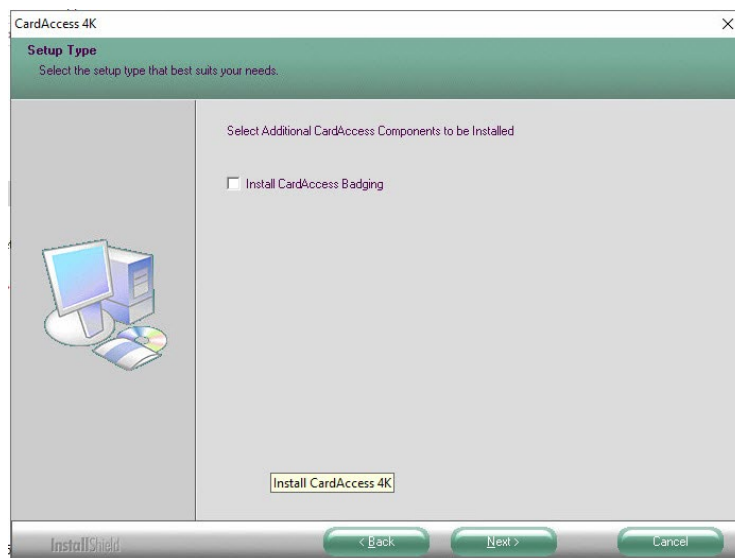

8. The **Select Destination Folder** screen displays. If you wish to change the Destination Folder, click **Browse** and select the new destination folder. Click **Next**.

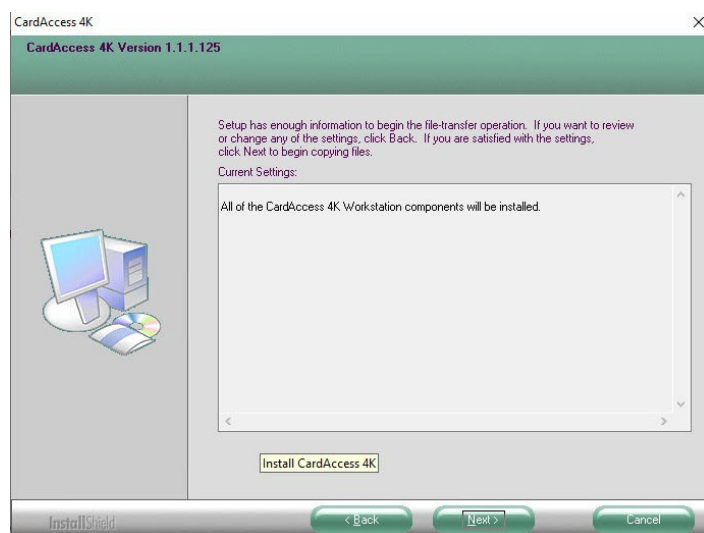

9. The **Select CardAccess Components** screen displays. For our demonstration, we will not select to install EPI Badging. Click **Next**.

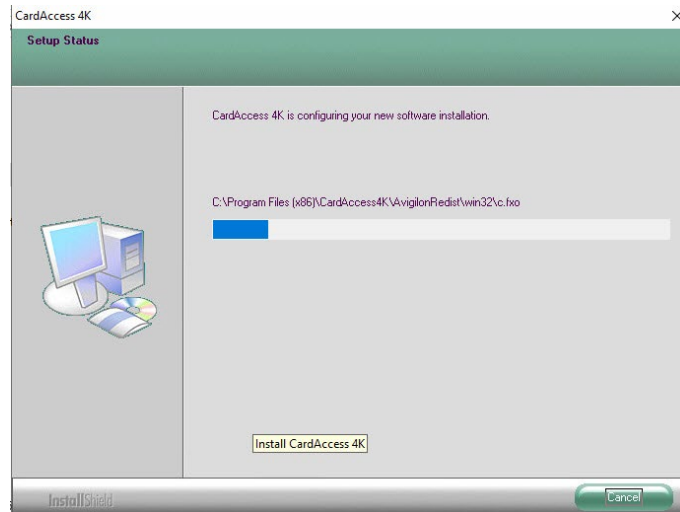

Note: If you purchased the EPI Badging package, select the **Install CardAccess Badging** selection.

10. The **Current Settings** screen will display. Click **Next**.

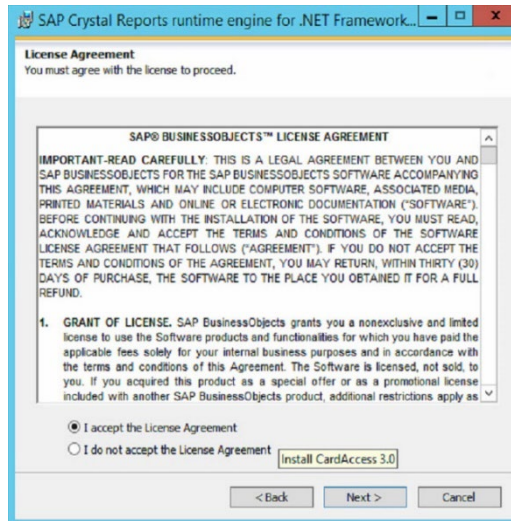

11. A Progress Bar will display during the installation of the CA4K™.

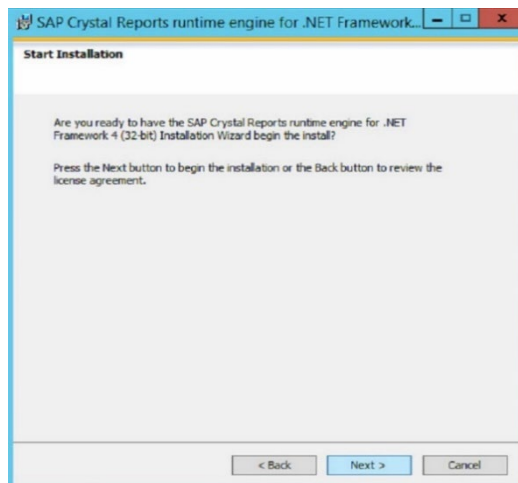

12. The **Welcome to the SAP Crystal Reports runtime engine for .NET Framework 4 (32 bit) Installation Wizard** screen will display. Click **Next**. (Note: If Crystal Reports is already installed, please skip to page 14).

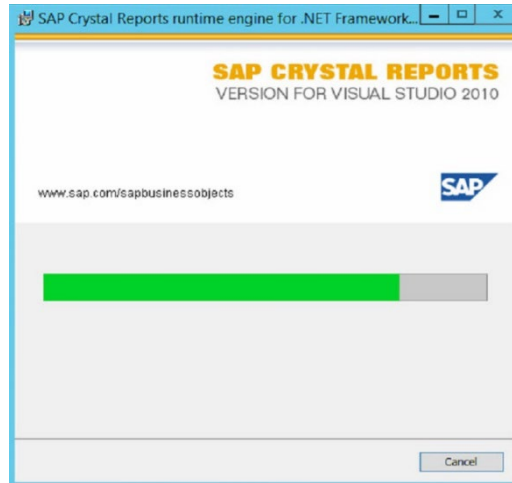

13. The SAP Crystal Reports **License Agreement** screen displays. Select **I accept the License Agreement**. Click **Next**.

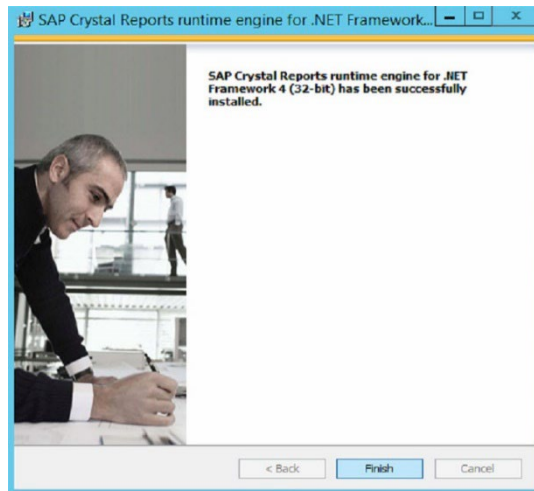

14. The SAP Crystal Reports **Start Installation** screen will display. Click **Next**.

15. A progress bar will display while the **SAP Crystal Reports** is installing.

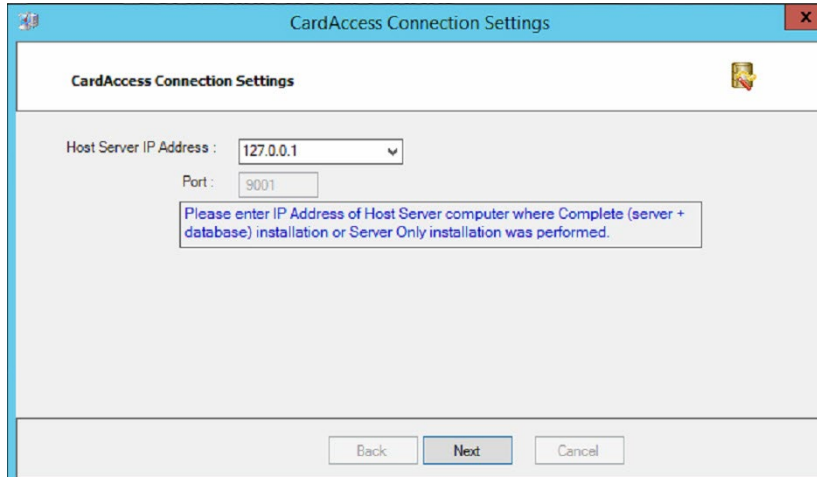

16. After the installation is complete, the **SAP Crystal Reports runtime engine for .NET Framework 4 (32 bit) has been successfully installed** screen displays. Click **Finish**.

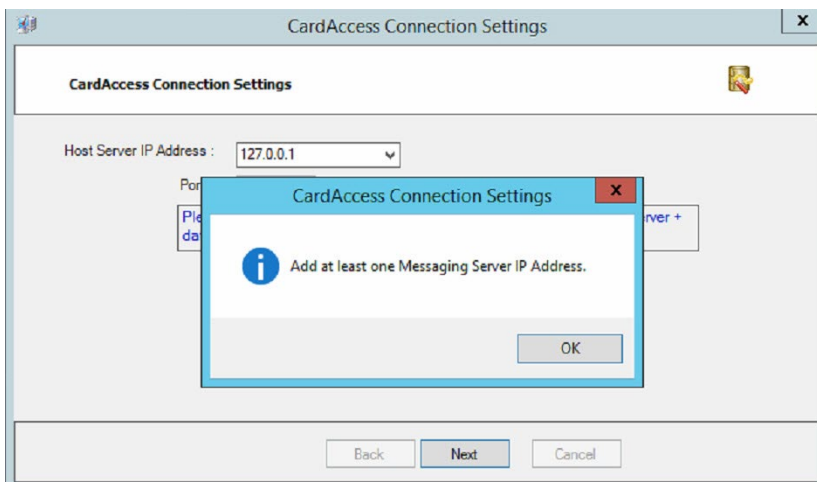

NOTE: Prior to the connection screen displaying, a few screens will quickly flash.

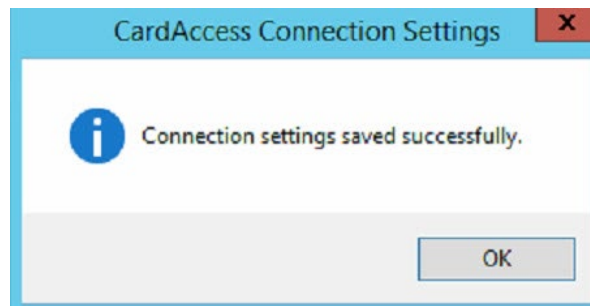

17. The **CardAccess Connection Settings** screen displays. You must type in the IP Address of the CA4K Server (Host) Computer. Click **Next**.

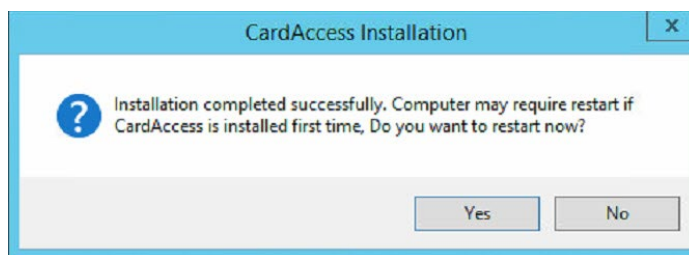

18. Failure to type in the IP Address of the Host Server computer will cause the following screen to display. You must type in the IP Address of the CA4K Server (Host) Computer. If this screen displays, click **OK** to proceed.

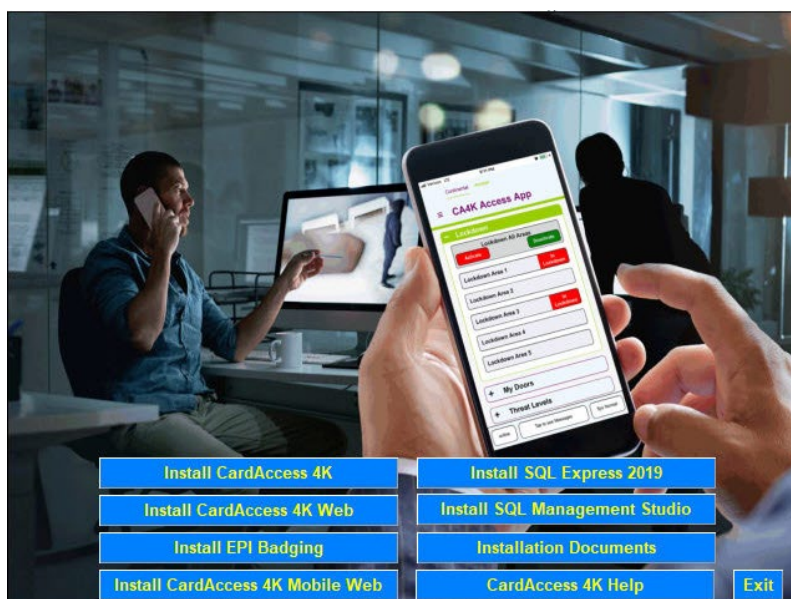

19. If the correct IP Address was entered in, a **Connection Settings Saved Successfully** screen displays. Click **OK**.

20. After the Connection is saved, the **CardAccess Installation completed successfully** screen displays. Click **Yes** to restart the computer.

21. If the **CA4K™ Main Menu** displays. Click **Exit**.

NOTES:
